SUMMARY

Full-Stack Software & Product Engineer with over 1 year of experience engineering scalable web applications and microservices using TypeScript, React/Next.js, NestJS, and PostgreSQL. Bridging product design systems in Figma with robust software architecture, specializing in full-stack Monorepos, accessible UI libraries (Radix/Tailwind), multi-tenant SaaS engines, and Dockerized environments.

EXPERIENCE

Software Engineer (Contract) Sep 2026 – Present

Adhi Global Nepal

- Co-engineer a multi-tenant full-stack enterprise application, handling end-to-end product delivery from Figma product design systems to Dockerized backend deployment.
- Architect backend services in NestJS and PostgreSQL, implementing dynamic tenant data isolation, middleware request routing, and Role-Based Access Control (RBAC).
- Build performant frontend interfaces in React/Next.js, seamlessly integrating multi-tenant state and APIs with design tokens.

Software Engineer Dec 2025 – Aug 2026

AR Forge Tech Pvt. Ltd. Kathmandu, Nepal

- Promoted from Full Stack Intern to Junior Developer within 3 months based on performance and rapid adaptability.
- Engineered end-to-end full-stack features using NestJS, PostgreSQL, Prisma ORM, and Next.js/TypeScript, optimizing database queries and integrating production APIs with Material UI client interfaces.
- Took end-to-end ownership of client features and project deployments, conducting testings, leading direct client technical requirement calls, and managing cPanel production web server configurations.

UI/UX & Frontend Intern Aug 2024 – Nov 2024

Softech Foundations Pvt. Ltd. Kathmandu, Nepal

- Created wireframes, high-fidelity mockups, and interactive prototypes in Figma for web applications.
- Translated design systems into frontend interfaces using JavaScript, HTML5, and CSS3.

SELECTED PROJECTS

PuffinPal — B2B Multi-Tenant Invoicing Platform (In Active Development) | NestJS, Next.js, TypeScript, PostgreSQL, Prisma ORM, Tailwind, Monorepo, Docker, DBeaver

- Architected a full-stack Monorepo SaaS platform sharing TypeScript schemas across a multi-tenant NestJS backend (PostgreSQL/Prisma tenant isolation, RBAC) and an accessible Radix UI/Tailwind Next.js frontend, backed by Docker Compose environments.

Full-Stack Basketball Management Platform | React.js, Node.js, Express, TypeScript, PostgreSQL, Figma

- Prototyped complete user flows in Figma and engineered a sports management hub featuring real-time messaging, notifications, a talent hiring portal, and Khalti payment gateway integration.

Shangrila & Himalayan Sip Web Products — Business Website | Next.js, TypeScript, Tailwind CSS, Framer Motion, Vercel

- Designed the visual branding and developed a professional business website focused on presenting company information, services, and brand identity.

SKILLS

Frontend & Design:	React.js, Next.js, TypeScript, Tailwind CSS, Radix UI, JavaScript, Framer Motion, Material UI, Figma
Backend & Database:	Node.js, NestJS, Express.js, PostgreSQL, Prisma ORM, WebSockets, REST APIs
Tools & DevOps:	Docker, Monorepo (Turborepo), Git, GitHub, Linux (Ubuntu), VS Code, DBeaver, Vercel

EDUCATION & CERTIFICATIONS

BSc (Hons) Computing 2022 – 2025

London Metropolitan University / Islington College

Certifications: AWS Academy Cloud Foundations, Responsive Web Design, Figma Essential Training, JavaScript Language
